

manipulation which has had many positive effects in terms of protecting millions of people from the ravages of flooding but has also very fundamentally changed the character of the Florida Everglades. The Corps of Engineers has presented to the Congress its recommendation of how to remedy the scars that have been imposed on the Everglades. If authorized by this Congress, the Everglades restoration plan of the Corps of Engineers will be the most extensive restoration of an environmental system ever undertaken in our Nation's history and, in all probability, in the history of the world. It will be an effort at the beginning of the 21st century of the scale, boldness, and challenge that the Panama Canal was at the beginning of the 20th century.

This is also going to be a project which will challenge America financially. The estimate is that over the 20 years to complete this project, the total cost will be approximately \$8 billion. The State of Florida will pay half; the Federal Government will pay half. The math indicates that for each year for the next 20 years, the average demand on Federal resources for this restoration project will be approximately \$200 million.

I think it is critical before we begin this restoration we have the maximum assurance of the resources necessary to complete the restoration. I use the analogy of open-heart surgery. If one is going to open up a system and take a great knife and begin to cleave the changes that have occurred in the Everglades over the last 50 years so that at the conclusion of this operation we will have a healthier, more natural system, it is incumbent upon those who start the surgery to be assured they will have the resources to complete the operation. Failure to have those resources at any stage throughout this 20-year process will certainly result in the death of the patient.

We have taken some steps to attempt to assure a more reliable source of funds for the National Park Service. Your colleague, Senator THOMAS, led the way to reform with his landmark legislation on the National Park Service called Vision 2000. This legislation adopted for the first time both concessions reform and science-based decisionmaking on resource needs within the Park Service. We took a big step forward last year with the extension of the fee demonstration program. The fee demonstration program allows individual parks to charge entrance fees and to use a portion of the proceeds for maintenance backlog and natural resource projects. This action generated about \$100 million annually for the Park System.

Now it is time to take the next step. Earlier this year with Senators REID and my colleague, Senator MACK, we introduced legislation entitled "The National Park Preservation Act." This legislation would provide dedicated funding to the National Park Service to restore and conserve the natural re-

sources within our Park System. This legislation seeks to address the long-term efforts required to truly restore and protect our natural, cultural, and historic resources within the National Park Service.

This legislation would allocate funds derived from the use of a nonrenewable resource, our offshore drilling in the outer continental shelf, to recover the American resource of oil and gas. We would then convert those funds derived from the Federal royalty on offshore oil and gas drilling for a program of restoration and preservation of our natural, cultural, and historic resources within the National Park Service. These funds provided by our bill would assure that each year the National Park Service would have the resources it needed to restore and prevent damages to its resources.

At the beginning of this century, at a time of relative tranquility, President Theodore Roosevelt managed to instill a nation with a tradition of conservation with this simple challenge: Can we leave this world a better place for future generations?

At the end of this century, we honor Senator John Chafee who leaves a legacy of a legal infrastructure that provides a foundation upon which we can continue to meet President Theodore Roosevelt's challenge. Let us keep the vision of these great leaders in mind as we embark together on our efforts to protect the National Park System into the new century.

In the words of President Theodore Roosevelt: Nothing short of defending the country during wartime compares in importance with the great central task of leaving this land even a better land for our descendants than it is for us.
